Overview

Shogo was founded in 2018 by a group of seasoned experts from the electricat, electronic, precision mechanical, automotive, and other fields. In addition to flexible copper / aluminum busbars, which are frequently utilized in new power lines, Shogo also develops and produces solid copper, braided copper, solid aluminum and braided aluminum busbars; as well as coaxial power cables with connectors/terminals.

The products that Shogo provided are used in battery interconnection assembly in new energy automotive plants, electrical cabinets manufacturing facilities for communication and energy conservation, electricity and electrical engineering fields, high and low voltage wires factories, welding equipment industry, and electrical and electronic equipment factories.

Shogo Viet Nam places a strong emphasis on quality, particularly meticulous attention to detail in every aspect of our products or services. From the production process to customer service, everything is designed to ensure perfection and maximum satisfaction for our customers. Shogo Vietnam also consistently invests in research and development, ensuring that we remain at the forefront of green technologies that are environmentally friendly.
